Hardware Encrypted External Portable Drive

FIPS LEVEL 3 VALIDATED 140-2

Unlock with mobile app

Unlock via mobile app. Remote Management Ready

- **FIPS 140-2 Level 3 Validated: Certificate #3349**
- Face ID/Touch ID authentication, password retrieval and 2FA
- Host OS Independent - Compatible with all USB 3.1/3.0/2.0 Ports
- Hardware-Encrypted XTS-AES 256-bit
- Brute Force Anti-Hacking Self Destruction
- Inactivity AutoLock, Read-Only Mode, Remote Wipe
- Preloaded With DriveSecurity® Antivirus (by ClevX®)

FEATURES

HOST OS INDEPENDENT

SecureDrive® BT will work with any OS. There are no drivers or software to update; all encryption and authentication are performed directly on the drive.

WIRELESS USER-AUTHENTICATION

Unlock wirelessly from your smart phone/tablet (Android/Apple) or Apple Watch.

REMOTE WIPE

SecureDrive® BT is the only hardware-encrypted portable drive that can be remotely wiped with a unique command in the event that it is lost or stolen.

STEP-AWAY AUTOLOCK

The Step-Away AutoLock locks the drive when the iOS/Android device is moved about 10 ft away from the drive for longer than 5 seconds.

SLIM SECUREDRIVE® DESIGN

12.5 mm

At 12.5mm, SecureDrive® is the thinnest portable hardware-encrypted hard drive on the market.

REMOTE MANAGEMENT READY

SecureDrive® BT can be remotely managed via a web console that allows Admins to control where and when the drives can be accessed with Geo-Fencing and Time-Fencing. Additional features include remote unlock, password change, remote wipe, or disable access even if the user has set a password.
