SecureDrive® KP Quick Start Guide

SECUREDRIVE® KP
Welcome to the SecureDrive Keypad Model, our hardware encrypted external portable storage device that is OS-independent and has an on-board keypad for user authentication. For security, we strongly suggest changing the factory default PIN to your new user PIN.

NOTE: Start all procedures with the drive connected to a computer with the USB cable, and locked.

CAUTION: Risk of data loss. If you forget your User PIN and no Admin PIN exists, or if you forget both PINs, all data will be inaccessible and reformating will be required.

NOTE: After starting a procedure, perform each step within 10 seconds. If you fail (LED blinks) then restart the procedure.

LED INDICATORS
LEDs on the SecureDrive are represented below by colored icons.

- Red LED is solid: The drive is locked, or may indicate procedure failed
- Red LED is blinking: Locked, ready for input
- Green LED is solid: Drive is unlocked
- Green LED is blinking: Waiting for input
- Blue LED is blinking: Transferring data
- Key button
- Press Key button twice rapidly

UNLOCKING IN USER MODE

⚠️ CAUTION: Possible loss of data, settings, and both PINs. After 10 consecutive failed attempts to unlock the drive, it will reset to a blank drive. Refer to Brute Force Hacking in the User Manual.

1. Press  
2. Enter PIN (new only: 11223344, otherwise obtain PIN from vendor)  
3. Press  

CHANGING THE USER PIN
PIN REQUIREMENTS: 7-15 digits. Cannot all be the same number nor consecutive numbers. (4444)(1234)

1. Press  
2. Enter existing PIN  (factory default PIN is 11223344)  
3. Press  momentarily  
4. Wait for green LED then press  
5. Enter the new User PIN  
6. Press  
7. Re-enter the new PIN  
8. Press  

VERIFYING WHICH PINS EXISTS
Verify if a User and/or Admin PIN has been created. Without inserting the drive, press . These LEDs display for 10 seconds:

- No PIN exists  
- Only User PIN exists  
- Only Admin PIN exits  
- Both PINs exist  

DISCONNECTING AND LOCKING
Unplug the USB cable — the drive locks automatically. Generally, ejecting the drive first is not necessary, but preferable. To lock the drive without unplugging, press and hold until the red LED lights.
